Member of Qatar Foundation

Empower Generations Consortium solely aims to enhance the conceptual development of life sciences and grant youths life fulfilling careers that help them to dynamically engage with the societies, build their inner strengths, reshape their self-confidence, heighten their competency levels, improve their interpersonal skills initiate their social contribution, and influence their adeptness to the surroundings. The said main goals are archetyped through more than a few educational schemata within the same project.

The project has developed three main operational contexts

GPM- Genomic and Precision Medicine

Co-Activists: Males and Females High School Students

Context: Molecular Medical Biology, Genetics & Personalized Medicine

Projects operated under EGC

SEHHA- Science Education & Human Health Activity

Context: Healthcare Professions

QSBD- Qatar Scientists in BioDiversity

Co-Activists: Male High School Students

Context: Preserving the environmental BioDiversity through employing molecular science

Empower Generations Consortium (EGC) Pillars

Pillar (1): Career Education and field Application

Pillar (2): Competition for Scientific Innovation

Pillar (3): Externship

Pillar (4): Advanced Externship

Pillar (5): Scholarships and Sponsorships

Has more than 11 business partners involved

Has a bank of Databases and system of operation already established

Involves more than 55 health professionals & researchers
